DETAILED ACTION

This is the ninth office action for U.S. Application 10/074,245 for a Spill Proof Shelf Assembly Method and Structure filed by Rakesh Mathur et al. on February 12, 2002. Claims 1, 3-6, 9-18, 20, and 21 are pending.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 5, 2006 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12-18, 20, and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In the last 3 lines of claim 12, Applicant claims a forward portion, "providing a clearance for said rear tab and further providing a clearance for said forward tab, *said* clearance having a third width providing

Art Unit: 3632

a clearance for the forward tab. However, there is a clearance for the forward tab and a clearance for the rear tab. It is not clear which clearance Applicant is referring to.

Allowable Subject Matter

Claims 1, 3-6, and 9-11 are allowed. Claims 12-18, 20, and 21 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not disclose a shelf with a first side and forward and rear tabs extending respective first and second distances from the first side, whereby the first distance is less than the second distance, and a first shelf side support with a laterally projecting ledge for sliding engagement with the shelf, whereby the ledge has a rear portion sufficient for retaining the rear tab, a forward portion with a second width less than the width of the rear portion and providing a clearance for the rear and forward tab, and whereby the clearance has a third width providing a clearance for the forward tab, wherein the side support has a plurality of support members rigidly connecting the first shelf side support to a second shelf side support and configured to contact the forward tab when the shelf is in a first extended position.

Response to Arguments

Applicant's arguments with respect to claims 1, 3-6, 9-18, 20, and 21 have been considered but are moot in view of the new ground(s) of rejection.
